🛡️ CampaignGuard — 2 to 3-Min Video Pitch Script

Presenter Guide for Roopam • Clean, Natural, Catchy Delivery for Hackathon Judges

OFFICIAL DEMO SCRIPT

TARGET DURATION: 2:45 MIN

PRIMARY SPEAKER	LIVE URL	VIDEO STYLE	TONE & ENERGY
Roopam (Presenting)	**cg.kshitijpro.xyz**	**Screen Share + Voiceover**	**Confident, Clear, Engaging**

Quick Setup for Roopam Before Recording: 1. Open Chrome at `https://cg.kshitijpro.xyz`. 2. Set browser zoom to 100% or 110% for crisp readability. 3. Keep this script handy on a second screen or side window. 4. Move the mouse cursor smoothly — no fast jerking.

🎬 Scene 1: The Problem & The Solution (The Hook)

`0:00 – 0:25 (25s)`

🖥️ SCREEN ACTION (WHERE TO LOOK & CLICK)

1. Start on the homepage at `https://cg.kshitijpro.xyz`.
2. Keep cursor over the headline: "*Automated Pre-Publication Preflight Review*".
3. Slowly scroll down past the three feature pills to show the clean UI.

> 💡 **Roopam's Cue:** Start with a warm, energetic voice. Hook the judges immediately with the real-world pain point.

🎙️ SPOKEN VOICEOVER (WHAT TO SAY)

"Hi judges! Every marketing team knows this nightmare: a Brand Manager approves a **20% seasonal discount**, but the creator uploads a banner claiming **50% off**, or uses illegal superlatives like '*miracle cure*'. By the time legal catches it, thousands in revenue and customer trust are already lost."

"Meet **CampaignGuard** — an enterprise-grade preflight verification system that automatically audits marketing campaigns against human-truth contracts **before anything goes live**."

🎯 Scene 2: Live Visual OCR Sandbox & 1-Click Auto-Fix

`0:25 – 0:55 (30s)`

🖥️ SCREEN ACTION (WHERE TO LOOK & CLICK)

1. Scroll down smoothly to the section titled: `#demo Test Campaign Preflight`.
2. Point cursor to the left box: **"Mandated Discount: 20% OFF"**.
3. Point to the middle graphic banner: highlight the **pulsing red bounding box with target crosshairs** framing `30% OFF EVERYTHING`.
4. Click `Auto-Fix Identified Violations`.
5. Watch the red box turn into a green checkmark: `✓ #1 RECONCILED: 20% OFF`.

🎙️ SPOKEN VOICEOVER (WHAT TO SAY)

"Let's see it in action right on our homepage sandbox. On the left is our canonical **Brand Truth Contract** — mandating a strict 20% discount. In the center is the submitted creative."

"Notice how our **Visual OCR engine** doesn't just read the text — it spatially pinpoints the fault with **target bounding crosshairs** framing '*30% OFF*'! No guessing where the error is."

"Now watch this: I click **'Auto-Fix'**. In less than half a second, the contradiction is reconciled, the banner copy is corrected to 20%, and the bounding box turns **emerald green**. Zero manual back-and-forth."

🛡️ CampaignGuard — Video Pitch Script (Continued)

Core Round 3 Features: Multi-Role RBAC & Visual Change Orders

SCENES 3 & 4

ELAPSED: 0:55 – 2:05

👥 Scene 3: Enterprise RBAC & Tokenized Invite Links

`0:55 – 1:30 (35s)`

🖥️ SCREEN ACTION (WHERE TO LOOK & CLICK)

1. Scroll to top navbar and click `Go to Dashboard`.
2. On `/dashboard`, click the first campaign card: **"EcoSip Spring Launch"**.
3. Scroll down to the **Campaign Team & Invites** card.
4. Click `+ Invite Member` button.
5. Select Role: `Reviewer`, enter an email, and click **Generate**.
6. Show the generated tokenized invite link with its 7-day expiration.

🎙️ SPOKEN VOICEOVER (WHAT TO SAY)

"Now let's jump into our **Campaign Governance Hub**. In enterprise production, you cannot have creators approving their own work or visitors impersonating executives."

"Here in **EcoSip Spring Launch**, as a Brand Manager, I can generate a **cryptographically tokenized invitation link** for a Reviewer. Each token is single-use, expires in 7 days, and is strictly bound to the campaign."

"Even better: our server enforces **Membership Roster Verification**. Even if a malicious user alters their request payload to say 'Reviewer', the server checks the roster and rejects them with an HTTP 403 Forbidden. Total security."

📋 Scene 4: Evidence-Linked Change Orders & Creator Revision

`1:30 – 2:05 (35s)`

🖥️ SCREEN ACTION (WHERE TO LOOK & CLICK)

1. In the campaign view, scroll to the **Visual Creative Asset Annotations** section.
2. Point to the visual hotspot boxes: **#1 (50% vs 20%)** and **#2 (Missing Disclaimer)**.
3. Click on Hotspot Box #1 — watch the screen smoothly scroll and highlight the exact finding!
4. Scroll down to the **Grouped Change Order Panel** assigned to Marcus Vance.
5. Point out the 4 issues and click `Auto-Fix & Submit Revision 2`.

🎙️ SPOKEN VOICEOVER (WHAT TO SAY)

"When an asset fails preflight, CampaignGuard doesn't leave you with a generic error list. It automatically generates an **interactive visual annotation overlay**."

"Clicking any red hotspot immediately jumps to the exact contract evidence citation. The system groups all detected issues into a formal **Creative Change Order** assigned directly to the creator."

"When the creator uploads their revision, our automated re-analysis runs instantly — marking all four issues as **RESOLVED** and moving the campaign into **Revision 2**, ready for review."

💡 **Judges' Key Takeaway:** CampaignGuard turns messy Slack and email feedback into a structured, trackable, audit-backed creative revision lifecycle.

🛡️ CampaignGuard — Video Pitch Script (Conclusion)

Cryptographic Sealing, Tamper Invalidation & Executive Analytics

SCENES 5 & 6

ELAPSED: 2:05 – 2:45

🔒 Scene 5: Authorized Reviewer Seal (SHA-256) & Tamper Demo

2:05 – 2:30 (25s)

🖥️ SCREEN ACTION (WHERE TO LOOK & CLICK)

1. In the top role switcher, switch to `Reviewer (Taylor Morgan)`.
2. Scroll down to the **Reviewer Approval Panel**.
3. Click `Authorize & Seal Revision 2` -> point out the **SHA-256 hash** (e.g. `803f336a...`).
4. Click `Simulate Tamper` -> point out the red alert: **TAMPER_DETECTED / INVALIDATED**!
5. Click `1-Click Auto-Fix` to restore the valid sealed state.

🎙️ SPOKEN VOICEOVER (WHAT TO SAY)

"Now for the ultimate security gate. Only an authorized Reviewer can lock an asset. I switch to Taylor Morgan, our Reviewer, and click **'Authorize & Seal'**."

"CampaignGuard generates an immutable **SHA-256 cryptographic seal**. But what happens if someone modifies the asset copy after legal approval? Let's click **'Simulate Tamper'**."

"Boom! The cryptographic hash mismatches immediately! The status flashes **INVALIDATED**, and the tamper attempt is logged to the audit trail. With our **1-Click Fix**, we instantly restore compliance."

📊 Scene 6: Cross-Campaign Governance Analytics & Pitch Close

2:30 – 2:45 (15s)

🖥️ SCREEN ACTION (WHERE TO LOOK & CLICK)

1. Click on the **Analytics** tab or scroll to the top of `/dashboard`.
2. Point cursor over the **5 Standardized KPI Cards**: • *Campaigns Audited: 3* • *Confirmed Violations: 7* • *First-Pass Compliance: 100%* • *Avg Revision Velocity: 1.3 Rounds* • *Sealed Vaults: 1*
3. Scroll up to show the live URL: `cg.kshitijpro.xyz`.

🎙️ SPOKEN VOICEOVER (WHAT TO SAY)

"Finally, executives get real-time compliance oversight through our **Governance Analytics Dashboard** — tracking 5 unified KPIs across all brand campaigns."

"CampaignGuard transforms marketing from stressful manual reviews into a **provable, tamper-evident, automated pipeline**."

"With **31 automated test assertions passing**, zero cold starts, and full mobile responsiveness, CampaignGuard is enterprise-ready and live today at **cg.kshitijpro.xyz**. Thank you!"

Roopam's Winning Sign-off Checklist: Keep total time under 3:00 • Clear mic audio • Smile at the end!
